

**Training Council, Indian Society for Clinical Research,  
In coordination with JCDC, Pune Presents**

***Full Day Workshop-  
Strengthening the Roles & Responsibilities of Clinical Research Coordinator  
“The Backbone of Site”***

Clinical Research is evolving in the country as well as across the globe. With the introduction of the Risk Based Monitoring practices & changes to the existing regulations within our country, the conduct of clinical research needs to be viewed with a different perspective.

While the Principal Investigator (PI) is responsible for the conduct and management of the clinical trials; the Clinical Research Coordinator (CRC) supports, facilitates and coordinates the daily clinical trial activities to ensure appropriate clinical trial implementation. Thus, it is essential to ensure that CRC is well-trained and able to assist the PI with relevant aspects of the trial.

This workshop has been designed to help the CRCs understand their responsibilities and perform their duties efficiently so as to meet the above requirements.

## **Objective:**

To understand the responsibilities and duties of a CRC along with the expectations that various stakeholders have from the CRC.

## **Who should attend?**

Clinical Research Coordinators, Principal & Sub Investigators, Study nurse, Support staff managing clinical studies, aspiring clinical research professionals working at the site

## **Workshop Topics:**

- Roles & Responsibilities of a Clinical Research Coordinators
- Expectations & Challenges during the various stages of a trial
- Tips & Tricks on how to effectively manage a site
